OBJECTIVE

New-grad SDE with 1906 LeetCode rating and production experience shipping Next.js + Django features for 60k+ user fintech workflows, seeking full-time SDE-1 roles.

EDUCATION

Indian Institute of Information Technology, Manipur

2022 – Expected May 2026

Bachelor of Technology (Computer Science and Engineering [AI & DS])

CGPA: 7.9

EXPERIENCE

Saarathi Finance

SDE Intern — Aug 2025 - Current, Mumbai

- Developed core backend and frontend features for Telecaller Workflow, Data Collection, and Policy Manager modules using Django, Next.js and TypeScript; built scalable APIs serving 60k+ customer records.
- Designed and implemented 100+ REST APIs with validation, retries, and error handling, reducing production submission failures while optimizing Next.js performance.
- Debugged and resolved 10+ production issues on live systems, improving internal tool reliability.

MyRevue

Frontend Intern — Oct 2024 - Feb 2025, Remote

- Implemented production-ready React frontend components that improved interface responsiveness and delivered a significantly more polished user experience.
- Led user research and developed interactive Figma prototypes; collaborated with the team to iterate designs, resulting in significantly improved website usability and layout consistency.

CODING PROFILES

Solved 1000+ DSA problems on Leetcode. (Max rating 1906[knight])[[Leetcode](#)]

Codeforces Specialist (Max Rating 1455) [[Codeforces](#)]

SKILLS

Programming Languages	C++, JavaScript, TypeScript
Core CS	Data Structures & Algorithms, OOPs, DBMS, OS, CN.
Frontend	Next.js, React.js, CSS (Tailwind).
Backend	Node.js, Express.js, Django.
Databases	MongoDB, MySQL, Redis
Deployment	Docker, Vercel, Render, GitHub Actions.
Tools & Platforms	Git, GitHub, Postman, Figma, Linux.

PROJECTS

LocalSearch++

[\[GitHub\]](#)

(C++, Inverted Index, TF-IDF, File I/O)

- Built a local document search engine in C++ that crawls .txt files recursively, performs text normalization, tokenization, stopword removal, and builds inverted, positional indexes for fast keyword & exact phrase search.
- Implemented TF-IDF relevance ranking and a CLI-based search tool with flat-file index persistence to enable index-once, query-many and faster startup by loading prebuilt indexes.

Prasikshan — SSB Preparation Platform

[\[Live\]](#) [\[GitHub\]](#)

(Next.js, TypeScript, MongoDB, Redis, JWT, Tailwind CSS, FastAPI + Azure OpenAI)

- Built a full-stack SSB preparation platform with 7 test modules, currently used by **20+ active users**, featuring JWT authentication, OTP-based password recovery, dual-layer Redis rate limiting, and Redis-based session caching with refresh token management, AI-powered test review via FastAPI microservice with Azure OpenAI.
- Implemented performance analytics, leaderboards, and an admin CMS for managing questions and monitoring results, and containerized the application using Docker with Nginx for scalable, production-ready deployment.

ACHIEVEMENTS

- Leetcode Weekly Contest 460: Global Rank 563, GFG : Rank 1 in College
- Central India Hackathon [CIH] Finalist recognition among 2,000+ teams.
